👤 PROFILE SUMMARY

Senior Software Engineer with **8 years of experience** building scalable web applications and backend services using **React.js, TypeScript, Javascript, Node.js** and modern web technologies. Experienced in frontend architecture, micro-frontends, REST APIs, distributed systems, performance optimization, accessibility, testing, and enterprise-scale application development.

🧠 SKILLS

Frontend — React.js | Typescript | JavaScript | HTML5 | CSS3 | Next.js

Backend — Node.js | Express.js | Java | Spring boot | Kafka

State Management — Redux | Context API | React Query

Architecture — Micro-frontends | Design systems | Distributed Systems

Databases & Cloud — MySQL | PostgreSQL | Docker | Kubernetes | CI/CD | AWS

Testing — Jest | React Testing Library | Cypress | Playwright

Build & Developer Tools — Webpack | Vite | Git | JIRA | Lerna | NX Monorepo

Performance — Code Splitting | Lazy Loading | Rendering Optimization | Accessibility (A11Y) | i18n & l10n (Internationalization & Localization)

AI & Productivity Tools — Github Copilot | Ollama(LLM) | Qwen3 | Claude

🏆 AWARDS

Bravo Award, Walmart Global Tech
01/2025

Impact Award, Informatica Business Solutions Private Limited
11/2021

🎓 EDUCATION

Bachelor of Engineering (Computer Science), GOVERNMENT COLLEGE OF TECHNOLOGY - COIMBATORE
2014 – 2018

🔧 WORK EXPERIENCE

Walmart Global Tech India, Senior Software Engineer

07/2022 – Present | BANGALORE, INDIA

- Developed scalable Seller Center applications using React.js and TypeScript for international Walmart markets.
- Built Product Tax Code feature for CA/MX markets, reducing incorrect tax submissions and item creation failures.
- Implemented localization and internationalization support for US, Canada, Mexico, and Chile markets.
- Migrated Vajra platform from standalone architecture to Micro Frontend architecture integrated with Walmart DX platform, increasing adoption by ~20%.
- Built reusable enterprise-grade Table component used across multiple Walmart teams with advanced filtering, sorting, pagination, customizable columns, and server/client-side filtering capabilities.
- Migrated Vajra application from legacy UX to modern Figma-based UX designs.
- Developed backend APIs using Java(Springboot) for HBR creation, deletion, and paginated retrieval.
- Wrote unit/integration tests using Jest and React Testing Library.
- Participated in code reviews, deployment orchestration, and mentored junior engineers.

Informatica Business Solutions Private Limited, Software Engineer

06/2021 – 07/2022 | BANGALORE, INDIA

Droplets UI Platform

- Worked on Droplets, Informatica's reusable enterprise UI component library used across multiple product teams.
- Developed reusable and accessible React components following WCAG standards.
- Improved component usability, customization, and developer experience across teams.
- Contributed to frontend architecture, performance optimization, bug fixes, and unit testing.

United Online Software Development Private Limited, Software Engineer

07/2018 – 06/2021 | HYDERABAD, INDIA

- Developed enterprise admin dashboards and customer-facing applications using React.js.
- Worked on interactive workflows including Call Block, Auto Attendant, and Virtual Fax features.
- Built Electron.js desktop application features including dial pad, call history, recent calls, and theme-based UI.
- Implemented secure session handling and inactivity-based auto logout functionality.
- Integrated REST APIs and delivered responsive cross-browser compatible user experiences.

🧩 PERSONAL PROJECTS

Inventory Management System (Microservices Architecture)

Node.js | Kafka | PostgreSQL | Docker | Ollama | Qwen3 | React

- Designed and developed backend services from scratch using Node.js and Express.js, initially following monolithic architecture and later migrating to microservices architecture for improved scalability and maintainability.
- Implemented REST APIs, Docker containerization using Docker Compose, and integrated Kafka for asynchronous event-driven communication between services.
- Introduced an AI-powered chatbot in the frontend using Ollama with the Qwen3 model to help users query order details and refund policy information through conversational interactions.

Personal Portfolio Website

React | Vercel

- Built a responsive portfolio with **modern UI practices, performance optimization, and SEO improvements.**
- Implemented **dark/light theme and cross-browser compatibility.**
